frs. Wilcox Wanted by the Police of Two States.

Chief of Police Murphy, of Jersey City, received a telegram a few days ago from Chief of Police William P. Drury of Chelsea, Mass., asking for the arrest of a woman who had shipped baggage to 243 Warren street, Jersey City, in the name of Mrs. J. H. Warren The baggage arrived, but no owner appeared, and it was returned to the office of the United States Express Com-

office of the United States Express Company.
Yesterday an order came for the shipment of the baggage to 52 Clinton street, Newark. When the luggage was delivered there Detective McNelly, of Jersey City, and a Newark policeman arrested Mrs. Ida Wilcox. She was taken to Jersey City and was remanded by Justice Potts this morning, pending further inquiry.
Chief Murphy says Mrs. Wilcox is wanted in Chelsea, Boston and Providence for swindling operations, and he thinks there is a case against her in Jersey City. Her plan has been to fit up a house or apartment on the instalment plan, ship the goods to some other city and sell them.

BRADY WILL INVESTIGATE.

Charges Against Inspector Dowling to Be Looked Into.

Superintendent of Buildings Brady to lay ordered a special investigation into the charges of bribery preferred against Building Inspector Edward Dowling and published exclusively in "The World" this morning.

The accusation against Dowling is that he extorted \$50 from Builders F. G. Sabatti and Pasquale A. Rich, who had a contract to move and make an addition to a frame house at \$73 East One Hundred and Forty-ninth street, owned by Ellen J. Murphy. The house is within the free limits, and a special permit is necessary before contemplated improvements can be made. Inspector Dowling, it is charged, walved these formalities upon the payment to him of the amount stated. "There is no record of any permit having been issued in this case," said Supt. Brady, "and I have detailed a man to make a thorough investigation of the matter and report to me as speedily as possible. What action I shall take will depend on that report, but you can rest assured that my investigation of the charges against Inspector Dowling will be thorough." The accusation against Dowling i

At midnight last night Nestor was having a drink at the bar in Devine's liquor store, 118 East Sixty-third street, when a lot of roughlooking fellows started a sham fight. During the excitement that followed Nestor said that Tierney knocked him down and robbed him of hal \$80 gold watch, which he wrenched from the chain.

After the fight was over, Nestor could ind no sign of the thief, and reported the matter to the East Sixty-seventh street station. Policeman Looney, who was on reserve duty, was sent out to search for Tierney, and soon found him in company with a number of men. The stolen watch was found in his possession. He was held for trial.

River, near Leesville, Conn., on Wednesday last. reached home this morning, under the care of Dr. J. H. Gunning, of 423 Lafayette avenue, who was telegraphed for after the accident. Purdy will recover.

The bullet was discharged from a 22-calibre rife and has lodged on the right side under the fourth rib. At the time of the shooting, Purdy's body was bandaged, as he was suffering from kidney trouble, and Dr. Gunning believes the bandages saved the wounded man's life. Purdy's dog jumped overboard from the boat, and young Purdy accidentally discharged the riffe in trying to prevent it falling into the water.

"I would like to answer that, too," he replied. "All I can say to you, how-ever, is that such a thing is possible. Everything is possible just now."

Beyond this Mr. Shepard had nothing say, except that he thought the antis had been badly treated at the Saratoga Convention, and that there was a strong

drawing, the sage returned, and solemnly announced:

"The cyclone has moved this morning to the vicinity of Hatteras. It has abated somewhat in violence, although northeast gales are prevailing along the coast, and especially over the ocean not far out. While we may not get the cyclone in all its southern fury, we can expect high winds in this vicinity, with rain, to-night and to-morrow.

"At this minute the wind is blowing over this roof at 26 miles an hour, and has kept up a general average since 8 o clock of 18 miles, broken by gusts and flaws which make it uneven. The man at Sandy Hook reports that a northeast wind is passing him at a velocity of 30 miles an hour, which, if not a gale, can be classed among high winds.

"This cyclone is phenomenal less from its destructive energy within its vortex than from its slow progress northward. While it has been rotating at a speed of from forty to seventy miles, and even more, it does not seem to have been able to move its territory faster than from ten to twenty miles an hour.
